BID NOTICE - 2019

Sealed Bids will be received at the office of the Cheboygan County Road Commission, located at 5302 South Straits Hwy, Indian River, Michigan, 49749, until **9:00 a.m. on Tuesday, February 19, 2019**, at which time and place they will be publicly opened and read aloud for furnishing the annual requirements of the following items:

- | | | | |
|-------|--------------------|-------|--------------------------|
| 19-01 | Aggregate Material | 19-02 | Bituminous Emulsion |
| 19-03 | Cold Patch | 19-04 | Hot Mix Asphalt Patching |
| 19-05 | Culvert Materials | 19-06 | Dust Control/Brine |
| 19-07 | Grader Blades | 19-08 | Hot Mix Asphalt |
| 19-11 | Pavement Markings | 19-12 | Plow Shoe & Wing Shoe |
| 19-13 | Road Signs | 19-14 | Aggregate Processing |
| 19-15 | Tires | | |

Please contact our office by calling 231-238-7775, faxing 231-238-0830 or by sending an e-mail (PREFERRED METHOD) to engtech@chcrc.com to obtain bidding package and specifications. All bids must be submitted on CCRC Bid Sheets in a sealed envelope (one item per envelope) clearly identifying the bidder and bid item. All Bids Shall be valid for a period of one year from the date of award.

Bids will be awarded at the regular Road Commission Board meeting on February 21, 2019. The Cheboygan County Road Commission reserves the right to accept or reject any and all bids, in whole or in part; to waive irregularities or informalities; and to award bids, in whole or in part, as deemed to be in the best interest of the Cheboygan County Road Commission.

MDOT specifications must be met and material certification provided.

2019 Aggregate Processing CCRC Bid No. 19-14

The Cheboygan County Road Commission will accept sealed bids for Processing and Stockpiling of Ice Control Sand, 2 inch minus crushed stone, 23A, and 23A(modified) aggregate in Myers Pit and Rondo Pit. All Materials shall meet current *MDOT Standard Specifications for Construction, 2012*, except as modified herein.

Bids shall be submitted on the enclosed CCRC Aggregate Processing Bid Sheet in a sealed envelope clearly indentifying the bidder and marked "Aggregate Processing".

Bidders shall include written statement of allowable discounts and terms of payment. All bids shall be valid for a period of 1 year from date of award.

Bids are due at **9:00 a.m. on Tuesday, February 19, 2019**, at which time, the bid will be publicly opened and read aloud. Bid results will not be available until they have been tabulated and presented with recommendations and approved by the Road Commission Board at their next regular meeting on February 21, 2019.

Cheboygan County Road Commission reserves the right to accept or reject any and all bids, in whole; to waive irregularities or informalities; and to award bids in whole, as deemed to be in the best interest of the Cheboygan County Road Commission.

If you should any questions and/or concerns with this bid document, please contact me directly.

Cheboygan County Road Commission 2017 Aggregate Processing

The Cheboygan County Road Commission (CCRC) will accept bids for its annual Aggregate Processing needs. All materials shall meet the current *MDOT Standard Specifications for Construction, 2012*, except as modified herein.

Material testing by a MDOT Certified Aggregate Technician Level One shall be the responsibility of the successful bidder (Contractor). Contractor shall provide a copy of their technician's certification to the CCRC Engineer Technician prior to aggregate processing. A copy of aggregate sample test results and sample splits of ALL tests shall be provided to the CCRC Engineer Technician DAILY for verification. The Contractor shall provide a copy of all test results to the CCRC Engineer Technician once production run is complete. Testing frequency shall be consistent with MDOT standard practices, at a minimum, one test shall be conducted each day of production. The CCRC Engineer Technician reserves the right to complete additional samples and test randomly throughout the production run. SEE GRADING REQUIREMENTS.

The CCRC makes no statement or warranty as to the quality and/or availability of natural materials within the prospective pits. The Contractor shall be responsible for supplying materials as necessary to meet the aggregate grading requirements. The failure of the producer to locate adequate raw materials shall not be grounds for any claims against the CCRC. The CCRC strongly encourages bidders to visit/examine sites prior to bidding.

All products/by-products of the aggregate processing operation shall become property of the CCRC or its designee without limitation or restriction. The Contractor shall be responsible for clean up and shaping of the pit to a safe condition after aggregate production is complete as directed by Engineer Technician. Contractor shall create a uniform stockpile (to minimize segregation), neat and regular in form (Conical or Radial Stacker piles).

The Contractor shall furnish evidence of insurances as required by law. Additionally, the Contractor shall provide a copy of their safety program and written certification statement that their personnel meet the requirements of MSHA. The Contractor will be responsible for all moving permits. The CCRC will secure the required mineral permits for the respective production pits if necessary.

The Contractor shall provide a current certification information for the belt scale. CCRC will correct reported weights for a moisture content above 6%.

The producer shall arrange to meet with the CCRC Engineer Technician, (231)420-1158, at least two (2) weeks prior to setting up for aggregate production to agree on stockpile locations. Smoothing/leveling of the stockpile locations and overburden stripping will be completed by CCRC if necessary.

The material shall be processed in the pit identified on the CCRC Bid Sheet. The CCRC reserves the right to increase or eliminate quantities or pits from production as deemed necessary to meet the needs or fiscal constraints of the CCRC.

No exceptions or qualifications to these bid specifications shall be allowed except as approved in advance through an addendum to these specifications. Requests to consider an addendum must be received by the CCRC in writing not less than five (5) business days prior to bid opening. It shall be the responsibility of the prospective Bidders to ensure they have received any/all addendums.

For all locations:

- The Contractor shall furnish extra material to meet the Loss by Washing specification, if necessary, at no additional cost to the Cheboygan County Road Commission (CCRC). Contractor shall pile all leftover material in one location when work is complete. Location will be agreed upon by Contactor and Engineer Technician.
- The CCRC will be responsible for any mineral rights/royalties necessary to produce in the pits.
- The producer shall arrange to meet with the Engineer Technician, (231)420-1158, at least two (2) weeks prior to setting up for aggregate production to agree on stockpile locations.
- The CCRC reserves the right to increase or eliminate quantities or pits from production as deemed necessary to meet the needs of the CCRC.
- Ice Control Sand shall be made prior to producing any other Aggregate. Stone By-Product shall be used to produce 2” minus crushed stone material. 23A and 23A (mod.) may use Stone By-Product with approval of Engineer Technician.
- All products/by-products of the aggregate processing operation shall become property of the CCRC or its designee without limitation or restriction.

19-14 Bid Sheet continued

Myers Pit

Section 15, T37N, R1W, Benton Township, Cheboygan County, MI. This pit is owned by CCRC.

8000 to 10000 Tons of Ice Control Sand at \$ _____ per ton
(Shall be made prior to producing other Aggregates)

500 Tons of 2 inch minus crushed stone at \$ _____ per ton
(Shall be made from Stone By-Product from Ice Control Sand)

8000 to 13000 Tons of 23A(modified) at \$ _____ per ton

Completion Date: no later June 15, 2019

Rondo Pit

Section 19, T34N, R2W, Ellis Township, Cheboygan County, MI. This pit is owned by CCRC.

8000 to 10000 Tons of Ice Control Sand at \$ _____ per ton
(Shall be made prior to producing other Aggregates)

500 Tons of 2 inch minus crushed stone at \$ _____ per ton
(Shall be made from Stone By-Product from Ice Control Sand)

11000 to 14000 Tons of 23A at \$ _____ per ton

Completion Date: no later June 15, 2019

Allowable Discounts and/or Comments:

Note: All materials must meet current *MDOT Stand Specifications for Construction, 2012*, except as modified herein.

2019 Aggregate Processing Grading Requirements Cheboygan County Road Commission

Material Type	Class	2019 Grading Requirements											Loss by Washing (MTM 108) % Passing	
		Crushed Material, % min (MTM 117)	Sieve Analysis (MTM 109) Total Percent Passing(a)											
			2 in.	1 in	3/4 in	1/2 in	3/8 in	No. 4	No. 8	No. 16	No. 30	No. 50	No. 100	No. 200 (a)
Dense-Graded Aggregates	23A	25	-	100	-	-	60 - 85	-	25 - 60	-	-	-	-	9 - 16 (b)(c)(d)
	23A(mod.)	25	-	100	-	-	60 - 85	-	25 - 60	-	-	-	-	8 - 14 (b)(c)(d)
Fine Graded Aggregates	Ice Control Sand	-	-	-	-	-	100	95 - 100	65 - 90	-	20 - 65	-	-	0 - 5 (e)
Course Aggregates	2" Minus	-	100	-	-	-	-	-	-	-	-	-	-	-
Notes:														
a. Based on dry weights.														
b. The limits for Loss by Wash of dense-graded aggregates are significant to the nearest whole percent.														
c. When used for aggregate base courses, surface courses, shoulder courses, shoulders and approaches and the material is produced entirely by crushing rock, boulders, cobbles, slag, or concrete, the maximum limit for loss by Washing must not exceed 10 percent.														
d. Natural Clay must be used when necessary to add material to meet the Loss by Washing. Use of crusher dust, topsoil, etc. is not acceptable.														
e. Ice Control Sand is a basic guideline for grading requirement.
